

LENGTH OF TREATMENT

The length of treatment instances varies between individuals. Healthy persons may use the equipment during fifteen minutes per instance. For most beginners, however, a first session of fifteen minutes may be too long. It is recommended to begin slowly. It is essential to reach the level in which the instances of inhalation last 10 minutes. Treatment times exceeding twenty minutes are not necessary. Frequent treatment is more important. Three sessions of ten minutes every day produces a better result than one instance of thirty minutes per week.

ENERGIZED WATER

The **VALKION®** produces the activated air not only for inhalation, but also for drinking the **activated water**. The **VALKION®** enhances the water molecule in a unique manner that applies the energy of singlet oxygen photonic energy to the water you drink. It is recommended to drink energized water in conjunction with inhaling SOE.

VALKION® RESULTS

In an independent study, muscle cell mitochondria were stimulated during operation with VALKION® Energy. After four hours of ischemia, the VALKION group showed 40 % higher levels of ATP than the control group. In another series of tests with **VALKION®**, 10 normal individuals showed a 20 % increase in the Total Antioxidant Status (the blood's capacity to cope with free radical production) and decrease in cholesterol after only two weeks. Another study, where 10 high-performance athletes inhaled VALKION air during two weeks, resulted in a 7 % increase in oxygen absorption by the blood and 8 % reduction in residual lactic acid in the blood after intense physical activity. These studies and numerous testimonials from users all over the world indicate that almost everyone may enhance their wellbeing through the use of **VALKION®**.

VALKION® ENERGY

Next to the photosynthesis there is a less familiar natural process called photosensitization, in which sunlight, oxygen and chlorophyll produce singlet oxygen energy (SOE), a molecule with higher potential energetic effects. Plants given water enriched with SOE grow stronger with bigger root systems and survive longer than plants receiving regular water. Replicating nature's way of producing SOE is a complex task. Finding the right balance of light, air, moisture and – most importantly – optimizing the “chlorophyll catalyst” has taken us 20 years of research. We call the result **VALKION® Energy!** The photons (light particles) emitted are pure and uncorrupted - something not even nature itself can guarantee today, where sunlight wavelength is negatively filtered by man-made atmospheric pollutants and electromagnetism.

“Life requires energy! Our muscles require energy when we move. We need energy to think. Energy input is required for the production of new biological molecules.”

It seems certain that through sessions with the **VALKION®** one can obtain a much better quality of life.

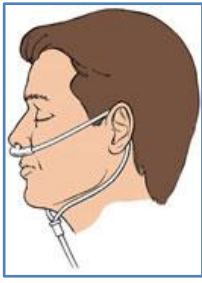

PRODUCT DESCRIPTION

This special instrument called the **VALKION®** converts normal air oxygen into singlet oxygen. Singlet oxygen has a very short lifetime and emits energy as it degrades to the ground state oxygen level. It is the energy that body utilizes, not the actual singlet oxygen particle. The main effects of singlet oxygen energy on human beings are:

- ✓ Powerful reduction of free radicals' production
- ✓ Detoxification
- ✓ High energy production, better performance
- ✓ Reduction of cholesterol, triglycerides and uric acid
- ✓ Rejuvenation

HOW DOES VALKION® WORK?

VALKION® imitates nature. It has an activation chamber, where an artificial light source acts together with a high efficiency heat-and light resistant "photosensitizer". Through the work of an air pump, a stream of activated air is created. This can then be inhaled, with or without the inhalation mask or nasal canula.

Findings show that moist air is essential. Thus every unit is equipped with a humidifier giving the activated air a humidity level of at least 85%.

The energy released through this machine has remarkable properties when it is absorbed by water molecules in the air, including a considerable reduction in the production of free radicals.

WHO CAN BENEFIT FROM THE USE OF "VALKION®"?

Chronic pain	Parkinson's	Alzheimer's	Cardiovascular disease	Chronic fatigue	Visual disturbances
Diabetes	Asthma	Burn-out syndrome	Circulation disorders	ADD	Allergies
	Sleep apnea	Bronchitis	Insomnia	ADHD	
			Autism		

Inhaling air filled with **VALKION® Energy** can help!

Inhaling energized air may cause a powerful detoxification process for people with decreased immune system

VALKION® is a world leader in wellness solutions. Our mission is to harness the power of nature, enabling people to enjoy a **better quality of life!**
